The Panduit Adjustable Depth 4 Post Rack
Strength and flexibility in a multiple depth rack to fit your network needs.

TINLEY PARK, IL (April 2021) – The Panduit Adjustable Depth 4 Post Rack is designed to support network equipment found in data center environments. The rack combines the stability of a cabinet with the accessibility of an open rack to provide the user with maximum flexibility when designing the network layout. Upgrading active equipment in telecommunication rooms and data centers often requires a deeper rack. The adjustable depth 4 post rack system provides maximum versatility in a single part number. Bonus holes in the posts allow for various accessories to be mounted, such as PDU brackets, vertical patch panel brackets and vertical tie-off brackets to create greater application flexibility.

With the enterprise adjustable rack, adjust the depth of the current rack to fit network needs. Each rack has 39 different depth options from 23 inches to 42 inches in 0.5-inch increments. This provides flexibility while keeping cabinets clean and organized. The adjustable rack can be assembled in minutes and is self-squaring when assembled with the option of eight different masked grounding locations at all corners of the rack. The rack feet face inward for reduced footprint and improved safety risk (i.e. trip hazards).

About Panduit: Since 1955, Panduit's culture of curiosity and passion for problem solving have enabled more meaningful connections between companies' business goals and their marketplace success. Panduit creates leading-edge physical, electrical, and network infrastructure solutions for enterprise-wide environments, from the data center to the telecom room, from the desktop to the plant floor. Headquartered in Tinley Park, IL, USA and operating in 112 global locations, Panduit's proven reputation for quality and technology leadership, coupled with a robust partner ecosystem, help support, sustain, and empower business growth in a connected world.
