The Panduit Consolidation Point Box Enclosure
A versatile enclosure for frequently changing organizational requirements

TINLEY PARK, IL (January 1, 2020) – Panduit launches the Consolidation Point Box answering the demand for an enclosed zone enclosure for under floor, on wall, and in-ceiling applications. The PanZone Consolidation Point Box is a low-cost, easy-to-install solution, which provides a protected point of configuration within a permanent link allowing for interconnection/cross connection to a network service or device. The enclosed CPB provides accessibility and flexibility to reconfigure cable runs to meet frequently changing organizational requirements and reduces network downtime when these reconfigurations happen.

This enclosure is often used in applications including airports, offices, healthcare, and universities, serving as a consolidation/distribution point for horizontal cable runs. This low-profile solution is offered in various port sizes for applications ranging from small cubicle network connections to large building cable strategy.

With interchangeable panels, customers can use a consistent solution for a variety of network equipment. The Consolidation Point Box accepts MiniCom®, NetKey®, QuickNet™ and Fiber to ensure minimal parts and pieces needed for an infrastructure solution.

About Panduit: Since 1955, Panduit's culture of curiosity and passion for problem solving have enabled more meaningful connections between companies' business goals and their marketplace success. Panduit creates leading-edge physical, electrical, and network infrastructure solutions for enterprise-wide environments, from the data center to the telecom room, from the desktop to the plant floor. Headquartered in Tinley Park, IL, USA and operating in 112 global locations, Panduit's proven reputation for quality and technology leadership, coupled with a robust partner ecosystem, help support, sustain, and empower business growth in a connected world.
