## **“Splice” of the Action**

***Fusion Splice-On Fiber Optic Connectors provide a quick & easy solution to ensure seamless connectivity***

**TINLEY PARK, IL (October 8, 2018)** - Panduit Corp. a leading global provider of network infrastructure solutions, is proud to announce our recent launch of the Fusion Splice-On Fiber Optic Connectors that expands our fiber connectivity solutions. Single Fiber Splice-On LC and SC Connectors allow for rapid deployment of high-quality, high-performance fiber links in today's Enterprise and Data Center installations.

“The Fusion Splice-On Fiber Optic Connectors are an excellent addition to our fiber products portfolio,” states Product Manager, Seamus Hamrin. “They are a great combination of being easy-to-use, made with quality components, and achieving performance that meets our customers’ needs in today’s evolving fiber environments. This offering contributes to our goal of continuing to provide complete end-to-end solutions.”

Designed for ease of use and speedy termination on industry-leading fusion splice machines, Fusion Splice-On Fiber Optic Connectors enable users to create custom fiber links with minimal labor and no risk of shortages or excessive cable to be managed. The connectors help deliver immediate feedback on splice loss, which allows for consistent, reliable results for both singlemode and multimode terminations.
